

PERSONAL INFORMATION	Born in 1992 in Shanghai, China	
RESEARCH INTERESTS	Theoretical and computational astrophysics Plasma astrophysics and dynamo theories of stars, galaxies, and accretion engines Astrophysical turbulence	
EDUCATION	M.A. and Ph.D., University of Rochester, Rochester, NY, U.S.A. Theoretical astrophysics. Advisor: Eric G. Blackman, Ph.D. B.S., Fudan University, Shanghai, China Physics	2015-2020 2011-2015
PROFESSIONAL APPOINTMENTS	Postdoc Fellow, Tsung-Dao Lee Institute, Shanghai Jiao Tong University Nordita Postdoc Fellowship, Nordic Institute for Theoretical Physics (Nordita)	2022-present 2020-2022
ACADEMIC ACTIVITIES	Co-organizer of Nordita Winter School 2022 - Waves in Astrophysics, Nordita Undergraduate research at Fudan University • Holographic entropy in a topologically massive gravity theory. Supervisor: Lingyan Hung, Ph.D. • Laboratory work on electron-beam evaporation sources. Supervisor: Donglai Feng, Ph.D.	2022 2014-2015
FELLOWSHIPS AND AWARDS	University of Rochester • Horton Fellowship, Laboratory for Laser Energetics • Okubo Prize (for 1st place in the graduate written comprehensive examination) Fudan University • Honors Student Award in Physics, National Top Talent Undergraduate Training Program • Second Prize of the Scholarship for Outstanding Students • Scholarship for Freshman	2017-2020 2017 2015 2012-2014 2011
TEACHING EXPERIENCE	Department of Astronomy, Stockholm University • AS7019 - Astrophysical magnetohydrodynamics. Co-lecturer. Shared credit with Dhrubaditya Mitra, Ph.D. Department of Physics and Astronomy, University of Rochester • AST 231 - Special and General Relativity. Temporary Lecturer • AST 231 - Gravity. Teaching Assistant. • PHY 121P - Mechanics Mastery/Self-paced. Teaching Assistant. • PHY 122P - Electricity and Magnetism Mastery/Self-paced. Teaching Assistant.	Spring 2022 Fall 2018 Fall 2016 Spring 2016 Fall 2015
COMPUTER PROGRAMMING	• The <b>Pencil Code</b> : Developer (in Fortran), and one of the 20 owners of the code who have the privilege to give others check-in rights. The <b>Pencil Code</b> is a high-order finite-difference code for compressible hydrodynamic flows with magnetic fields and particles, with a large community of more than 108 users. • Mathematica: Both numerical and symbolic programming. • Python, C++: Beginner.	
GRANTS	• General funding from the China Postdoctoral Science Foundation • Postdoctoral Overseas Talent Introduction Program	2023 2022-2024
PRESENTATIONS	• The 32nd Texas Symposium on Relativistic Astrophysics, Shanghai, China <i>Helical and non-helical large-scale dynamos in thin accretion disks</i> • Shanghai Astronomical Observatory, Shanghai, China <i>Helical and non-helical large-scale dynamos in thin accretion disks</i>	December 2023 December 2023

- Purple Mountain Observatory, Nanjing, China October 2023  
*Decay laws of helical and nonhelical magnetically-dominated MHD turbulence*
- University of Graz, Graz, Austria September 2023  
Pencil Code User Meeting 2023  
*Helical and nonhelical large-scale dynamos in thin accretion disks*
- Institute for Advanced Study, Tsinghua University March 2023  
*New perspectives on the shear dynamo problem*
- Tsung-Dao Lee Institute, Shanghai Jiao Tong University October 2022  
TDLI Astrophysics Seminar  
*Developments in the shear dynamo problem*
- Nordita September 2022  
Virtual Nordic Dynamo Seminar  
*Scaling of the Hosking integral in decaying magnetically-dominated turbulence*
- Nordita June 2022  
Program: Magnetic field evolution in low density or strongly stratified plasmas  
*Scaling of the Saffman helicity integral in decaying magnetically-dominated turbulence*
- Nordita May 2022  
Program: Magnetic field evolution in low density or strongly stratified plasmas  
*Correlation times of velocity and kinetic helicity fluctuations in rotating and shearing turbulence*
- Nordita May 2022  
Pencil Code User Meeting 2022  
*Tutorial and updates on the Mathematica package for the Pencil Code*
- Nordita May 2022  
Pencil Code User Meeting 2022  
*Correlation times of velocity and kinetic helicity fluctuations in rotating and shearing turbulence*
- Nordita May 2021  
Virtual Nordic Dynamo Seminar  
*On the shear-current effect: toward understanding why theories and simulations have mutually and separately conflicted*
- Nordita May 2021  
Pencil Code User Meeting 2021  
*On the shear-current effect: toward understanding why theories and simulations have mutually and separately conflicted*
- Nordita September 2020  
Nordita Astrophysics Seminar  
*Precision of mean-field theories in Astrophysics with applications to dynamos and accretion disks*
- Center for Computational Astrophysics, Flatiron Institute August 2019  
Summer School 2019: Multiscale Modeling of Astrophysical and Space Plasmas  
*Minimal-energy state in accretion disk coronae and towards a holistic accretion model*
- University of Rochester February 2019  
3rd Annual Graduate Student Research Meeting  
*Astrophysical dynamos*
- University of Rochester February 2019  
Journal club of Astrophysics  
*Kinematic  $\alpha$  effect in mean-field dynamos*
- University of Rochester March 2018  
Qualifying Examination for Ph.D. degree  
*New perspectives on mean-field dynamo theories*
- University of Rochester March 2018  
Journal club of Astrophysics  
*Derivation and precision of mean-field electrodynamics with mesoscale fluctuations*
